Re: Arrcom, Inc./George W. Drexler, your letter dated March 5, 1990,
received my offices March 10, 1990

Dear Sir;

Arrcom, Inc. has been out of business for at least 10 years.
We had a loss as to what this letter pertains to. Please clarify
at your earliest convenience.

Because of Mr. Drexler's medical condition, he is unable to
travel anywhere beyond a 30 mile radius of his cardiologist. If
you have any questions, please do not hesitate to contact me.

Sincerely Yours,

A.N. Foss, President

Re: RCRA Facility Assessment at Arrcom, Inc.

Dear Mr. Drexler:

The Hazardous and Solid Waste Amendments of 1984 (HSWA) establish the authority in the Resource Conservation and Recovery Act (RCRA) program to address releases of hazardous waste or hazardous constituents from solid waste management units. This program applies to operating, closed or closing RCRA facilities. The RCRA Facility Assessment (RFA) is a mechanism which the U.S. Environmental Protection Agency (EPA) utilizes to carry out the corrective action authorities of HSWA. The corrective action authorities enhance the RCRA program for detecting and correcting releases from regulated waste management units as well as those resulting from past waste management practices at RCRA-regulated facilities. Releases to all media (air, soils, and surface and ground waters) from all waste units are within the jurisdiction of the RCRA corrective action program. At present, in the state of Washington, EPA is responsible for implementing this program.

EPA would like to schedule a RFA at the Arrcom, Inc. site as soon as practicable. The RFA will be conducted by contractors to EPA, who will assist in the assessment of whether corrective action is necessary to address any past releases of hazardous waste or constituents from any active or closed, solid or hazardous waste management unit(s) on the facility property. Section 3007 of the Resource Conservation and Recovery Act (RCRA) [42 U.S.C. §6927] authorizes the EPA to request certain information from handlers of hazardous waste. Pursuant to §3007 of RCRA, and to facilitate the RFA process, information is requested as follows:

1. For all waste handling units on your property--including landfills, storage facilities, waste piles, surface impoundments, wastewater treatment units, injection wells, transfer facilities, resource recovery facilities, and any other waste handling operation--identify all past and present releases and spills of waste material. Include both solid and hazardous wastes. Give the approximate dates and locations of each spill or release.
